### **2. Asvagandha (*Withania somnifera*) Extract**

**Traditional use: Withania somnifera** popularly known as 'ASHWAGANDHA' is one of the major herbal components of geriatric tonics mentioned in Indian systems of medicine. In the traditional system of medicine Ayurveda, this plant is claimed to have potent aphrodisiac rejuvenative due to the Antioxidants and life prolonging properties. It has general animating and regenerative qualities and is used among others for the treatment of nervous exhaustion, memory related conditions, insomnia, tiredness potency issues, skin problems and coughing. It improves learning ability and memory

**Internal uses: Nervous system:** As it is a sedative and nervine tonic, it helps in atonic nerves, fainting, giddiness and insomnia. **Digestive system** The bark powder is appetizer, carminative and anthelmintic and hence is used in abdominal pain, constipation and worms. **Circulatory system** : It has an effect on the heart, purifies the blood and reduces oedema. So it is used for the weakness of heart, blood disorders and oedema. Its decoction is used in rheumatoid arthritis. **Respiratory system** : It is an expectorant and has antiasthmatic property due to which it is useful in cough. Ashwagandha ash along with ghee and honey is effective in asthma, If phlegm is thin, it is used in the form of ash or its alkaline extract is used. Decoction of bark should be given in low dose for cough and asthma. It is also used as a tonic in the above conditions. **Reproductive system** Ashwagandha is well known for its aphrodisiac property. It is used in semen disorders and leucorrhoea caused due to endometritis.

### **3. Kapikacchu (*Mucuna pruriens*) Extract uses**

**Nervous system:**-The roots and seeds are tonic for the neurons- The root is useful in hemiparesis and facial palsy. The seed - powder is useful in Parkinson's disease. **Digestive system:** The legumes are anthelmintic for roundworm. Trichome 0.3 - 0.5 gm. is given mixed with butter, jaggery or honey. Next day a laxative is given-The round worm are killed and expelled out. **Reproductive system:** The seeds are very useful in oligospermia and impotence. Seeds soaked in the root extract relieve vaginal laxity. The oil from seeds is useful in leucorrhoea. **Urinary System:** The root has diuretic property, renal dysfunction.

#### **Pharmacology**

*Mucuna pruriens* seeds contain high concentrations of [levodopa](#), a direct precursor of the neurotransmitter [dopamine](#). It has long been used in traditional [Ayurvedic](#) Indian medicine for diseases including [Parkinson's Disease](#).<sup>[15][16]</sup> In large amounts (e.g. 30 g dose) it has been shown to be as effective as pure [levodopa/carbidopa](#) in the treatment of Parkinson's Disease, but no data on long-term efficacy and tolerability is available.

In addition to levodopa, *Mucuna* also contains [serotonin](#) (5-HT), [5-HTP](#), [nicotine](#), [N,N-DMT](#) (DMT), [bufotenine](#), and [5-MeO-DMT](#). As such, it could potentially have [psychedelic](#) effects, and it has purportedly been used in [ayahuasca](#) preparations.<sup>[18]</sup>

The mature seeds of the plant contain about 3.1-6.1% L-DOPA,<sup>[12]</sup> with trace amounts of [5-hydroxytryptamine](#) (serotonin), nicotine, DMT-n-oxide, bufotenine, 5-MeO-DMT-n-oxide, and [beta-carboline](#).<sup>[19]</sup> One study using 36 samples of the seeds found no tryptamines present in them.<sup>[20]</sup> The leaves contain about 0.5% [L-DOPA](#), 0.006% [dimethyltryptamine](#) (DMT), 0.0025% [5-MeO-DMT](#) and 0.003% DMT n-oxide.
